

MEAD CON *Environmental Policy*

Mead Con is committed in principle and practice to the protection of the environment in which we operate.

Concurrently, we have a legal and moral responsibility to ensuring the reduction of negative impacts of the working environment on our employees.

We maintain environmental responsibility in our activities by:

- preventing pollution to soil, air and water;
- preventing damage to flora and fauna;
- conservation and usage of materials, energy and water;
- recycling of materials wherever possible;
- minimisation and correct disposal of waste through efficient use of all materials and inputs;
- commit to providing a safe and healthy working environment in which our employees work by maintaining our Health & Safety Management Plan [Refer *OCM-PO-001_H&S_Policy_Rev2*].

We achieve this by:

- complying with legal requirements and adopting higher standards where necessary;
- developing environmentally sound construction practices and education programs;
- encouraging employee involvement and consultation;
- ensuring that the requirement for environmental responsibility is integrated into decision making and considered in assessment of performance;
- continually assessing the environmental impact of all our operations to ensure we deliver each of our policy objectives;
- being alert to technical advances that may improve environmental performance.

MEAD CON Representative:

A handwritten signature in blue ink, appearing to read 'Tim Mead', written over a horizontal line.

Tim Mead
Managing Director

Dated: 14/10/14

Working Wisely! A stylized recycling symbol consisting of three chasing arrows forming a triangle.
