Mead Con Testimonial

Degree C have worked with Mead Con on many construction projects ranging in types, values, and complexity. Our experience working with Mead Con has been very positive.

We work with many different building contractors and have found Mead Con to operate among the best in the industry. Their project managers and site supervisors are very experienced and have great attitudes. There is a consistent open and honest communication between us and Mead Con during projects which allows for more effective management and supports us in achieving our objectives on the projects. Mead Con are always supportive of us and help where required to overcome project obstacles.

On site Mead Con ensure to create a safe working environment for all contractors. They have excellent housekeeping practices and provide ample and clean amenities. They create a positive culture on site by encouraging communication with them and between subcontractors. Initiatives such as site barbeques help create the positive site atmosphere.

Please give me a call if you wish to discuss this further, 0429 956 333.

Yours sincerely
